EWGLAM/SRNWP Meeting

Reykjavík / Online

28 September 2023

Review of this year's meeting

- Interesting ideas for cross-consortia cooperation popped up:
  - Collaboration on Machine Learning → new C-SRNWP ET?
  - Observations for hectometric scales
  - External databases → need for yearly update?
  - DestinE, GLORI

- Feedback is very welcome on:
  - Enough time for discussion or should be more?
  - Were the days too „packed"?
  - Poster session?
  - Parallel sessions

EWGLAM/SRNWP Meeting 2024

- Date: ???
- Place: ??? (hybrid meeting is planned)
- Special topic?
  - 2014: Renewable energy
  - 2015: fog and aerosols
  - 2016: nowcasting applications
  - 2017: convection
  - 2018: valuable scales in precipitation forecasts
  - 2019: crowd-sourced observations in NWP (ET-DA, ET-APP, ET-VERIF)
  - 2020: external parameters (ET-SURF)
  - 2021: machine-learning (ALL)
  - 2022: hectometric NWP (ALL)
  - 2023: Uncertainty of modelling components (ET-EPS)
  - 2024: ???
